Introduction

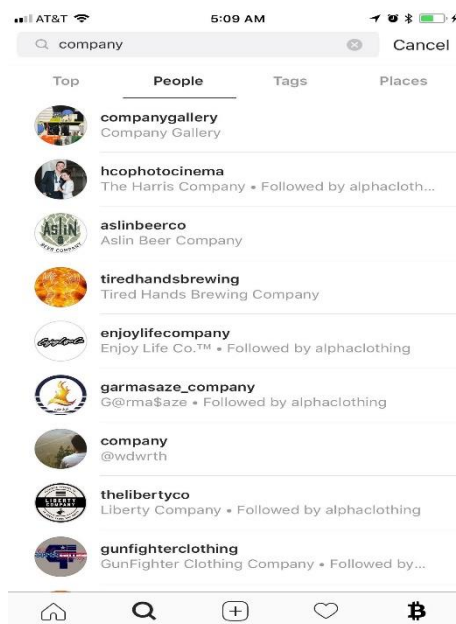

To being explaining this method, you are going to utilize snapchat as your platform to gain leverage over small companies and turn a profit. This method will be explained in the quickest way possible, with the shortest amount of text, and will avoid all useless “fluff” text.

What you are going to need before starting:

- An Instagram account and the Instagram app
- Snapchat downloaded

The Method

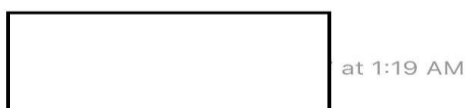

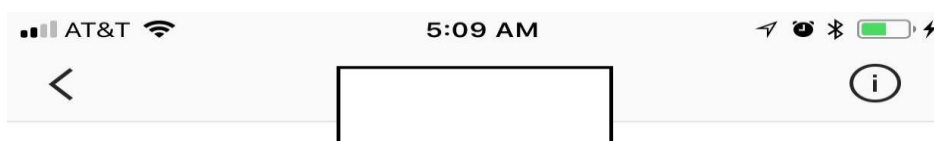

To begin, open Instagram and locate small companies. Instagram is the most “relevant” social media as of now, so, this is the platform we are going to use to locate businesses. You can either search in a preferred niche, or just search buzzwords such as “company”.

Once here, locate a few companies with short/ish names that aren't very common and then make a list of their names. From here, we are going to utilize snapchat to essentially steal their name. We are using snapchat because due to recent trends, it is apparent that snapchat is most rapidly growing social media platform. At the rate it is growing, it will even pass Instagram. Once downloaded, open Snapchat and begin to create new accounts with the usernames of the small businesses. Sometimes, the exact names are taken, however, improvising can still lead to profits. For example, I made a sale to a hosting company by putting my name as “NAME”hosting when the

companies Instagram was "NAME" hosts. To reiterate, try to keep your name as close as possible to the business that you are targeting.

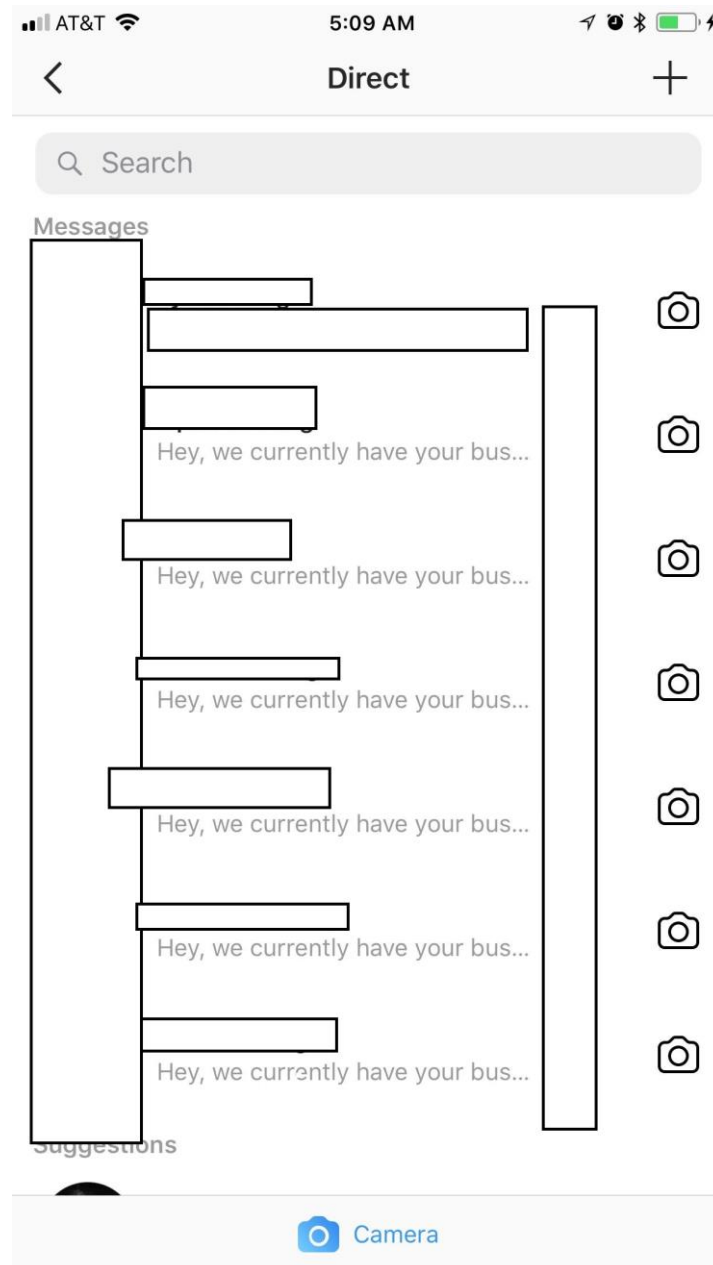

Once you steal a few names, then open Instagram and follow the businesses with your account. From here, DM the businesses with a message similar to this. I used this exact message to rack in tons of money.

Hey, we currently have your business name as the snapchat username "[REDACTED]". Proof of ownership can be provided if necessary. We are offering you the opportunity to purchase it for your company. The transaction will take place over the phone to ensure safety. Contact me back if you are interested.

Once you send this to a few companies, you should see something like this:

At this point, just sit and wait for the businesses to reply. While doing this, I've charged anywhere from \$20-\$300 per name using this method. If you end up stealing an exact name, and you see loads of potential in it and are not getting a reply, I encourage you to locate their business email and email them the Instagram message.

Closing remarks

To conclude this e-book, I can give you tips provided I have time. ALSO, if you have concerns or complaints, it would be GREATLY appreciated if you were to send these via PM instead of posting on the thread; I will respond faster.

Lastly, if you want discounts on my other products, methods, or tips on anything needed (in the future/currently), leave a vouch on the thread and shoot me a PM.
